Digital Learning Has Shifted Into Overdrive

Lenovo

Lenovo and Windows 11 help you manage the modern classroom with technology built for education.

94%

94% of teachers are open to blended learning with the proper resources, curriculum and support.[1]

Teachers need computing devices that help them nurture what matters.

Nearly 1/3 of K-12 IT leaders plan to retire within the next five years.[2]

By deploying, managing and updating devices via the cloud, IT can do more from anywhere.

1,149

TOOLS USED/MONTH

Districts use 1,449 different digital tools on average per month — up 52% over pre-pandemic levels.[3]

Streamlined access to apps, like Microsoft 365 and LanSchool, helps maximize instruction time.

8 out of 10 educators would like to see their schools use more video, attributing its use to better student outcomes.[4]

Video collaboration, via tools like Flip, is easier with performance-first hardware and Windows 11 user-focused features.

$9.7M

Ransomware attacks are up for K-12 and extremely costly—Baltimore County spent almost $9.7 million responding to a ransomware attack.[5]

Lenovo devices with Windows 11 help ensure data privacy with chip-to-cloud security, backed by the seamless protection of ThinkShield solutions.

61%

61% of educators expect the added flexibility of meeting online to be a lasting positive impact of the pandemic.[6]

Windows 11 makes it easier to meet, teach, and share content with Microsoft Teams.

As classrooms evolve, teachers need to make the most of every learning moment.

Lenovo devices with Windows 11 are tuned for the new learning landscape, where powerful collaboration and camaraderie are driving better outcomes for all.
