

24/7 protection for your touchscreen with the New Kastus enhanced clean surface technology Screen Protector

The global pandemic has changed how we interact with touchscreen surfaces forever. Now more than ever, consumers are concerned about interacting with shared touchscreens.

To help your business take proactive steps and offer peace of mind to your customers, Kastus[®] has partnered with Lenovo. Kastus' patented technology has been at the forefront of surface protection technology since 2014 and offers the ultimate enhanced cleaning protection for your touchscreen.

The screen protectors are powered by Kastus' patented, intelligent light-powered surface protection. Unlike other technologies, Kastus is uniquely fuelled by natural light so the cleaning benefits are continuously active indoors and out with no need for a specific UV light source.

The new Kastus touchscreen protector is applied like a regular mobile phone screen protector. It is designed to be easily installed on any existing touchscreen from 4" up to 31". Larger sizes up to 34" are available on request.
