

Smarter governance

Lenovo is your proven, reliable partner for progress.

As state and local governments seek to modernize their IT infrastructures to deliver enhanced services to their constituents, Lenovo stands ready as a proven partner for progress.

Lenovo is trusted by over 900 US state and local agencies, and 70 US military and civilian federal agencies, to provide solutions engineered for:

- Unmatched built-in security
- Demonstrated durability
- Expert contract and compliance management
- Rigorous supply chain transparency
- Extensive support and service options

Lenovo recommends
Windows 11 Pro for Business.

Lenovo's long history of delivering quality products has made us the world's #1 PC supplier. From our founding in 1984 through our acquisition of IBM's award-winning Think® lines of PCs, laptops, and server technology over the last two decades, Lenovo serves more than 1 billion customers around the world.

As an international, publicly-owned company, Lenovo is trusted as a global leader to deliver smarter technology to meet and progress beyond the challenges faced by public sector IT teams today.

Lenovo

Publicly owned and accountable

As a publicly traded company, we are open and accountable to our shareholders, who are equity owners of Lenovo from broad mix of global regions.

A brief history of Lenovo

As a *Fortune* Global 500 technology company and one of *Fortune* magazine's **World's Most Admired Companies**, Lenovo thinks and acts globally. Lenovo is committed to the **GSMA Digital Declaration**, identifying shared values across the technology industry for an ethical digital future.

Lenovo can trace its heritage back to 1984, but became the Think® brand you know in 2003 by acquiring IBM Personal Computing Division in 2005, growing to be the world's #1 PC supplier by 2013, and acquiring IBM's server lines in 2014.

In 2020, with consumer demand for premium animated content at an all-time high, Lenovo became the preferred data center innovation provider for DreamWorks Animation.

Lenovo recommends Windows 11 Pro for business

Lenovo has the most comprehensive portfolio of hardware, services, and support, so your teams can stay productive day to day while staying focused on mission-critical objectives.

For the mobile workforce, our industry-leading ThinkPad® X1 with Intel vPro®, an Intel® Evo™ Design and Windows 11 Pro for business, provides enterprise-grade performance with exceptional reliability.

The powerful ThinkStation and ThinkPad P Series workstations help agencies derive actionable insights from the vast amounts of data coming in from our increasingly connected world.

Protect it all with ThinkShield — end-to-end defense in hardware, software, services, and processes.

Lenovo

Why Lenovo is the **smarter** choice for government

Public-sector IT professionals rely on Lenovo for smarter devices, expertise, and services tailored to meet the ever-increasing needs of their communities.

Vetted and approved at every step in the journey

Lenovo has undergone five comprehensive reviews by the Committee on Foreign Investment in the United States (CFIUS) and has won approval each time.

Our consistently high level of success and satisfactory completion of annual CFIUS compliance audits reflect the strength of our governance.

US government compliant

Lenovo holds multiple certifications from the US government, highlighting our ongoing relationship as a trusted partner at the federal, state, and local level.

- **Current GSA contract/permission** to sell PC workstations to US federal agencies
- **TAA-compliant** manufacturing ability in Mexico and Hungary
- **Tier III Certification** representing the US Customs and Border Protection's highest-rated C-TPAT certification level
- **MIL-SPEC Certified** technology to ensure durability with hundreds of quality checks

Committed to partnerships across the industry

Lenovo has close working corporate relationships with some of the biggest names in the technology space, including AMD, Google, Intel, Microsoft, NetApp, Nutanix, and Oracle.

Lenovo understands your responders need reliable connectivity, so we offer multiple options to stay connected, as well as **FirstNet Built with AT&T** approved devices.

These companies are all also publicly traded and, like us, they take their own security extremely seriously.

Lenovo

Trusted and reliable security

With an ever-changing security threat landscape, new vulnerabilities can be discovered at any time, including after devices have been deployed within a customer's enterprise. Government agencies trust Lenovo to deliver the most secure endpoint devices, infrastructure, design processes, and governance.

- The ThinkShield hardware-embedded and security software portfolio safeguards all the physical layers of a device, building protections for holistic and comprehensive security coverage.
- Lenovo recommends using our rigorous Supply Chain Security program to ensure the quality of all partners in the device manufacturing process.
- Intel® Transparent Supply Chain and Intel® Trusted Device Setup ensure the integrity of components from source to factory to end user.
- The Lenovo Product Security Incident Response Team (PSIRT) proactively provides information to Lenovo customers if a vulnerability that affects Lenovo products is discovered.
- Lenovo is a certified CVE Numbering Authority (CNA), authorized to assign unique Common Vulnerabilities and Exposures (CVE) identification numbers to vulnerabilities.

Lenovo Managed Services for keeping government agile

Provide end users with a premium technology experience while providing IT teams the freedom to innovate. Lenovo offers a comprehensive portfolio of managed solutions engineered for reliability and productivity.
