Lenovo

ThinkSmart Hub

PURPOSE-BUILT, ALL-IN-ONE ZOOM ROOMS SYSTEM

The newly redesigned ThinkSmart Hub from Lenovo is a powerful tool for helping teams connect, share, and collaborate seamlessly and securely from wherever they may be working. It's built on the popular Zoom Rooms platform that your employees already know and comes with innovative, built-in security and manageability solutions from Lenovo and the built-for-business Intel vPro® platform.

EASY TO USE

With its 10.1-inch rotatable touchscreen and familiar Zoom Rooms interface, ThinkSmart Hub is truly intuitive technology that helps teams collaborate across multiple locations, whether on-site, at home, or anywhere else remote. Built-in features, like one-touch calling, make it easy for users to quickly initiate voice or video calls and share content.

EASY TO DEPLOY

Between its ThinkSmart One Cable mechanism and smaller footprint than the previous generation, ThinkSmart Hub results in fewer cords and less clutter on tabletops. With four built-in full duplex speakers and four dual array mics, ThinkSmart Hub creates immersive 360-degree sound in collaboration spaces of all sizes.

EASY TO MANAGE

IT teams can monitor, manage, and troubleshoot any number of ThinkSmart Hub devices from one centralized location using pre-loaded ThinkSmart Manager software.* Lenovo's optional Smart Office Professional Services are also available to provide more personalized support.

EASY TO TRUST

ThinkSmart Hub runs on Windows® 10 IoT Enterprise for the stability you need, while Lenovo's built-in ThinkShield security solutions, powered by the Intel vPro® platform, offer proven protection for your device and your business.
