

Kid-smart computing, designed for education

From rugged designs to curated apps, Lenovo laptops with Windows 11 SE are a perfect fit for young learners.

More than ever, K-8 students need easy-to-use, secure learning tools optimized for a cloud-first environment. The right technology can help students unleash their creativity, collaborate securely, and explore new topics in more meaningful ways — from anywhere. Meanwhile, school IT teams need the right tools to keep devices working reliably all year long. In many cases, cloud-only devices simply fall short of meeting students' needs, because they limit learning to locations with internet connections.

Lenovo and Microsoft are trusted partners in helping schools inspire and empower the next generation — with education-first devices that deliver better total cost of ownership (TCO) and student outcomes. In fact, Lenovo devices with Windows 11 SE are engineered for education, featuring a streamlined environment to improve focus and eliminate distractions. The integrated solutions also optimize online and offline lessons with familiar Microsoft 365 Education learning apps, along with curated educational tools.

Tough technology for go-anywhere learning

Lenovo education-first devices are built to take a tumble, with hardware designed to MIL-SPEC and Lenovo EDU Spec standards. The rugged features include 360-degree rubber bumpers, Corning® Gorilla® Glass displays, reinforced ports and hinges, mechanically anchored keys, and impact-tested touchpads. Plus, water-resistant keyboards mean that even big spills are no match for these learning machines.

The durable hardware pairs with the cloud-first OS to enable seamless access to productivity and learning. Windows 11 SE is optimized to provide faster start times and better performance, so students stay focused on learning. Device management is simplified with settings that are pre-configured for education. And since students cannot install or uninstall apps, performance is more consistent and reliable — freeing up IT time to focus on school priorities.

Why Lenovo and Microsoft?

- Lenovo has a long legacy of building better devices for more dependable K-8 learning, starting with ThinkPad engineering.
- Microsoft Windows 11 SE is a cloud-first operating system, focused on an educational mission.
- More than an upgrade, Lenovo devices with Windows 11 SE are engineered to support the realities of everyday life in the modern classroom — and beyond.

Built-in accessibility for curious minds

Lenovo devices with Windows 11 SE are designed to meet different learning, vision, hearing, and mobility needs, at no extra cost. It's important to note that less-privileged schools that remained remote in 2020-2021 lost the equivalent of 22 weeks of in-person instruction¹, and blended learning still presents challenges today. Fortunately, tools like Immersive Reader and Read Aloud help students of all learning abilities make the most of their lessons. Windows 11 SE is optimized for smaller form factors, which means that even smaller screens can deliver engaging interactions.

What's more, on touchscreen devices like the Lenovo 300w Gen 3, students get an enhanced experience with more adaptive controls, making it easier to type or to move and resize windows. This empowers students

of all learning styles to access materials independently, while teachers can personalize learning for every member of the class — making the best use of their time together.

Advanced security for safer learning experiences

Lenovo devices with Windows 11 SE are engineered with multiple layers of security to keep students and school data safe. New always-on protections safeguard the OS as well as stored information. IT teams can rely on powerful, CIPA-compliant content filtering to flag and block inappropriate material. Plus, sophisticated AI-driven software monitors and acts to combat cyberbullying.

For added peace of mind, Lenovo includes Absolute® cybersecurity software and SentinelOne® endpoint protection to help defend against emerging threats. Microsoft Intune for Education, a cloud-based mobile device management (MDM) service, helps IT ensure that the same security policies are applied to all devices. In addition, Windows 11 SE supports simple, integrated remote device resets — so IT can easily maintain a secure and trusted environment.

Find the right devices for your students

Get the IT that puts education first. Lenovo devices running Windows 11 SE help facilitate distraction-free environments, learning accessibility, and better education outcomes — without sacrificing manageability or security. To explore the cloud-first options for your school, visit:

Deliver the tools that elevate learning

Lenovo offers a full portfolio of cloud-first devices with Windows 11 SE. Built to minimize student distraction, Lenovo 14w, 300w, and 500w laptops with Windows 11 SE provide high-quality, secure learning experiences from nearly anywhere — even in locations without internet connectivity.

Lenovo 500w Gen 3

Boost learning possibilities with technology for the touch generation. This 2-in-1 laptop combines the intuitive Windows 11 SE interface with a tough-as-nails screen (students can even interact with it using a No. 2 pencil). It also comes with smart, tech-savvy features like a 360-degree hinge and world-facing camera, backed by the processing power of the latest Intel® Jasper Lake platform.

- Screen size: 11.6" HD IPS Touch (1366 x 768 pixels)
- Weight: 1.3 kg / 2.9 lbs.
- Storage: Up to 256GB
- Memory: Up to 8GB
- Graphics: Intel® UHD Graphics

Lenovo 300w Gen 3

Serve all kinds of learning styles with the ultimate learning machine. This 2-in-1 convertible features a drop-resistant design, improved water-resistant keyboard, and reinforced 360-degree hinge to withstand the struggles of a typical school day. Its Pencil Touch-ready touchscreen, plus the fluid tablet experience of Windows 11 SE, is ready to keep up with today's brightest minds.

- Screen size: 11.6" HD IPS Touch (1366 x 768 pixels)
- Weight: 1.3 kg / 2.9 lbs.
- Storage: Up to 128GB
- Memory: Up to 4GB
- Graphics: AMD Radeon™ Graphics

Lenovo 14w Gen 2

Empower your students to learn easily and securely from anywhere. Besides being thin and light, this laptop minimizes class disruptions with WiFi 6 connectivity, curated educational apps, and the Windows 11 SE clutter-free user experience. Its rugged design can keep up with rough-and-tumble student use. Plus, the Lenovo 14w comes with a front camera privacy shutter to keep students safe online.

- Screen size: 14" FHD (1920 x 1080 pixels)
- Weight: 1.45 kg / 3.2 lbs.
- Storage: Up to 256GB
- Memory: Up to 8GB
- Graphics: AMD Radeon™ Graphics
