

Lenovo Managed Endpoint

Move your IT team past the endpoint and get their heads into engaging projects

Hybrid working has given employees the possibility of working from anywhere and everywhere. But they're still expecting their devices to be just as efficient as they were in the office. Now that IT teams are mostly managing remote devices, their day-to-day has filled up with updates and patches, rebooting and upgrading – and not much use of their skills.

With Lenovo Managed Endpoint, you can set them free. By bringing all your laptops, PCs, tablets and mobile phones under one centralized platform, you can trust Lenovo to take care of the daily tasks on your behalf. So, you can finally get your IT team back to working on what's most important, while also delivering greater end user experience.

Drive productivity across the whole business

- Lift your IT team from the burden of everyday updating and patching and get their heads into business-critical tasks instead.
- Leverage **LDI Plus** predictive analytics to monitor devices and proactively respond to issues, enhancing end-user experience through better business insights.
- Reduce supply chain complexity and costs with all your devices under one management system.

Lenovo Device Intelligence Plus

It maximizes your device fleet performance and oversees its health, delivering deeper levels of persona analysis, productivity impact assessment and asset optimization for better employee experience. It includes:

- Professional tech experts & customer success team
- Device health performance monitoring & insights
- Employee Digital Experience Management
- Implementation & Steady-State Services
- Incident Management & Remediation
- IT resource planning consultancy

Be more flexible than your workforce

- Take advantage of a flexible monthly plan and scale your devices up and down with your company's needs.
- Choose an **OpEx** plan for a more manageable payment over traditional device purchasing.
- Manage Apple as well as Microsoft and Android devices seamlessly through **Intune with Jamf integration**.
- Have employees' own devices covered by the same centralized platform.

Get a trusted partner to manage your devices

- Rest assured your devices are in safe hands with the **#1 largest PC company in the world**¹.
- Count on the #1 company in customer support to help you retain talent and grow your business².
- Ensure your devices are secure with regular updates and patches all taken care of by Lenovo, Microsoft preferred partnership³.
- Let a **Top 25 supply chain ranking** simplify your device lifecycle and ensure you always get the best value⁴.

Still on-prem?

No worries! We can easily move you to the cloud with Lenovo **Migration Service**. Then, we'll take it from there with Lenovo **Managed Endpoint**.
