An Evo[™] Design

Planning for a flexible future

IT leaders today face challenges they might not have dreamed of just a few years ago. The sudden shift to remote/hybrid work put tremendous strain on internal teams and resources to keep employees productive, engaged, and secure in a work-from-anywhere world.

81% of IT leaders are **overwhelmed** by the functional aspects of their job.¹

An Evo® Design

Lenovo solutions feature Intel vPro,[®]

IT needs and users want.

The Lenovo logo is the word "Lenovo" in white, uppercase letters, centered within a red rectangular box. The background of the slide is a photograph of a woman with dark hair, wearing a yellow top, looking thoughtfully out of a window at night. The window shows blurred lights from outside. In the bottom right corner, there is a decorative graphic of overlapping colorful geometric shapes in shades of purple, blue, red, and pink.

ThinkPad® X1 Carbon

Lenovo TruScale includes modern devices like the ThinkPad X1 Carbon with Intel vPro,® An Intel® Evo™ Design, for business-class stability and reliability.

76%

of IT leaders **struggle to balance** business innovation and operational excellence.¹

At the same time, IT leaders are being asked to make business decisions that go far beyond technology — including forecasting, sustainability, and talent acquisition. But they still need to shape and drive the strategic vision for digital transformation that keeps their organizations competitive and thriving in a changing market.

Lenovo TruScale™ provides today's IT leaders with a streamlined path to achieve their bold vision for the future through “technology as a service.”

Whether your goals involve increased productivity, more flexible infrastructure, or meeting sustainability measures, **you can get there with Lenovo TruScale.**

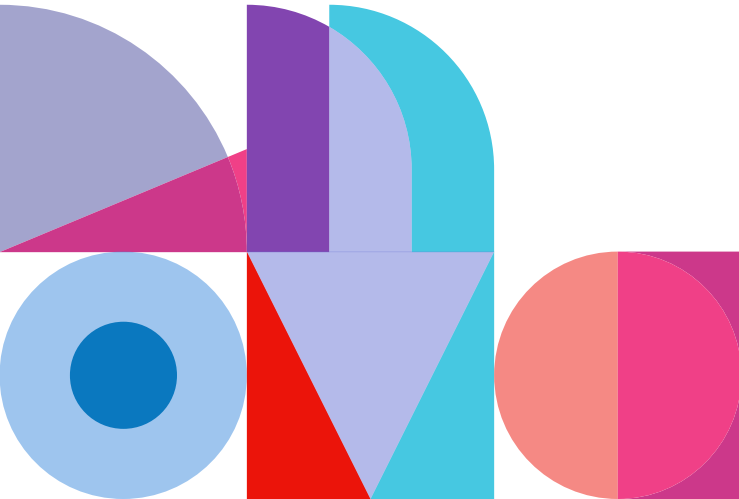

Simplify your path on the road ahead with Lenovo TruScale

Giving you the access to powerful and flexible solutions with the simplicity of a scalable consumption model, Lenovo TruScale lets you focus on organizational goals and strategies — knowing the transformative technology to ignite your vision is always available however, wherever, and whenever you need it.

Lenovo TruScale's as-a-service model represents a new way to access the full portfolio of proven Lenovo solutions with one point of accountability, one predictable monthly fee, and the flexibility to meet evolving business and market conditions.

With unmatched program flexibility, you can choose the services that fit your needs today and seamlessly scale up or down as your needs change through Device as a Service (DaaS), Infrastructure as a Service (IaaS), and Software as a Service (SaaS).

From the pocket to the cloud, TruScale helps you adopt technology as a service, giving you peace of mind and igniting your business strategy.

An Evo™ Design

ThinkPad® X1 Yoga

The Lenovo ThinkPad X1 Yoga features Intel vPro,® An Intel® Evo™ Design, for an exceptional thin and light business laptop experience.

Equip your remote workforce with Lenovo TruScale DaaS

With Device as a Service through Lenovo TruScale, seamlessly enable your workforce and let Lenovo take care of everything from provisioning to asset disposition.

Choose from the latest Lenovo devices with Intel vPro,® An Intel® Evo™ Design, and focus on business priorities instead of IT management.

Free up capital and improve employee productivity.

Get end-to-end services and support that precisely match your needs.

Enjoy the simplicity of one predictable monthly fee.

Easily add or remove devices from your plan. Pause your service as business needs change.

63%

of IT leaders reported they'd **increased their use** of Device as a Service (DaaS) over the previous year.²

An Evo Design

ThinkPad® X1 Nano

The efficient remote management features of Intel vPro,® An Intel® Evo™ Design, on the ThinkPad X1 Nano make it ideal for remote and hybrid work.

Get your employees up and running faster with Remote Work Enablement

The Lenovo Remote Work Enablement solution delivers all the hardware, software, and premium services your business needs to keep moving forward. And we ship everything, direct to your employees at home or the office.

-  Easy setup can include PC, external display, accessories, software, and instructions.
-  Standardizes employee experience and speeds new employee onboarding.
-  Consistent integration enables increased flexibility for remote and office-based workers.
-  Reduces downtime, technical issues, and IT administration by enabling end-user deployment on day one.

Lenovo TruScale: A smarter approach to managing IT in the modern age

Leverage the advantages of a scalable consumption model to include services that help free up valuable time and resources for your IT staff. Lenovo Managed Services solves for every facet of your device challenges, from end-user support through complete modernization, giving you:

Readiness. Be prepared for the evolving landscape of digital transformation and keep up with the complexity and demands of a remote workforce.

Security. Get control over device and data protection impacted by expanding perimeters and ever-evolving compliance standards.

Focus. Stop spending time on operational tasks and get back to innovative, strategic business priorities.

Comprising a wide range of service options, Lenovo Managed Services delivers a premium technology experience from start to finish while providing your IT teams with peace of mind.

Smart Service Desk. Resolve issues quickly and efficiently, no matter where your users or devices are working.

Smart Fleet Services. From hardware to software and everything that surrounds them, Lenovo Smart Fleet Services can cover any aspect of PC management.

Smart Managed Security by ThinkShield. Converged security powered by the built-for-business Intel vPro® platform keeps your users, your devices, and your data safe against evolving threats with exclusive features like Intel® Hardware Shield.

Smart Managed Solutions. From deployment through asset recovery and staff augmentation, whatever your support needs may be, Lenovo can help.

Built for Business

ThinkPad® P1 mobile workstation

ThinkShield converged security leverages the built-in hardware-enhanced security features of the Intel vPro® platform on devices like the ThinkPad P1 mobile workstation.

The pay-as-you-use data center with Lenovo TruScale

Enhance your ability to scale your IT hardware, software and support capabilities as your rapidly changing infrastructure needs evolve.

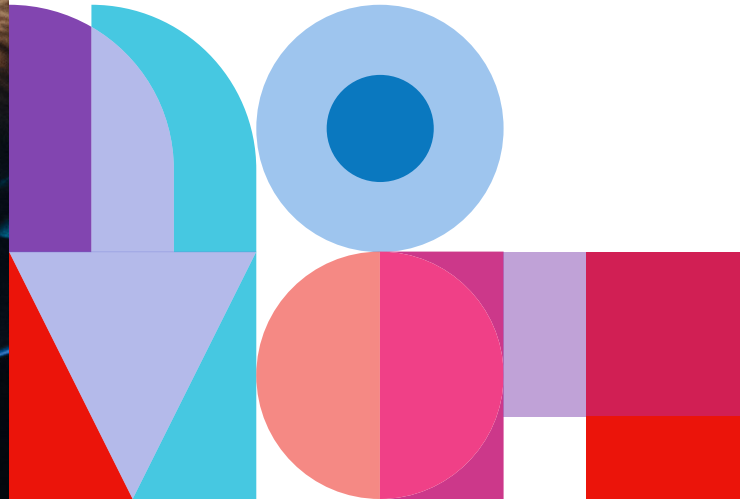

Lenovo TruScale Infrastructure Services give you all the power and strategic advantage of the latest data center hardware through a pay-as-you-go business model. Easily scale without incremental capital investments and focus more on your bigger picture, thanks to included 24/7 proactive monitoring, management, and services.

Right-sized, all the time. Enjoy the advantages for your on-premises data center hardware and services through a pay-as-you-go model.

Quickly provision new capability. Easily scale without incremental capital investments, keeping you ready for peak business performance and growth.

Stay ahead of change. Get the latest Lenovo hardware that meets your evolving needs and enjoy faster refresh cycles.

Security you control. Get the peace of mind and the benefit of physical on-premises security, capacity control, and protection of your data.
